

More than just calf milk

Milkivit

Milkivit is an investment in the health and performance of your herd. With Milkivit you give your calf the best start – it's more than just calf milk. Natural and sustainable, Milkivit contains specially selected dairy products and highly digestible oils and proteins to satisfy the needs of fast-growing calves, plus vitamins and minerals to promote health and a reduced need for antibiotics.

Milkivit ONE

Milkivit ONE and Milkivit Energizer have been designed with whole milk as the biological reference. They are skim-based, 100% dairy protein and contain higher energy for optimal development, resilience to disease and longevity.

Milkivit ONE also contains patent-pending LactoFat Pro fatty acid technology. This more closely replicates the fat profile of cow's milk and leads to superior gastrointestinal development, reduced incidence and severity of diarrhoea and higher starter feed intake.
