

Milkivit

Milkivit ONE ENERGIZED CALF MILK

Milkivit ONE is a next generation Energized Calf Milk containing patent-pending LactoFat Pro technology. Trials have shown enhanced rumen and intestinal development leading to fewer incidence of diarrhoea and respiratory disorders. Feeding Milkivit ONE also resulted in higher starter feed intake both before and after weaning. It provides a superior nutrient supply versus traditional calf milk replacers thus maximising health and calf performance both pre and post-weaning to set your calves up for the best LifeStart.

Science Based

LifeStart Science: cutting edge research by Trouw Nutrition

Unique Fatty Acid Technology

The first milk replacer with a fatty acid profile that closely resembles fat in bovine milk

27% Fat

Improved energy density

23% Protein

50% skimmed milk, 100% dairy protein base, supporting gentle digestion and low osmolality

Balanced Vitamins and Minerals

Responsible vitamin and mineral profile ensuring requirements are met and environment considered

ENERGIZED CALF MILK

Milkivit ONE has all the benefits of Milkivit Energizer with the addition of our patent-pending LactoFat Pro. This fatty acid technology more closely replicates the fat profile of cow's milk which stimulates **superior rumen and intestinal development** leading to...

Improved health

Higher starter feed and energy intake

Elevated calf wellbeing
